Innovation and Development of Laboratory Accessories and Bio-Technologies

[Cell Culture](#) [Western Blotting](#) [Protein Extractions](#) [DNA/RNA Extractions](#) [Taq/PCR/qPCR/ Loading Buffers](#)

Contact us, we offer excellent services:

1. Detect *Mycoplasma* contaminations for your cell lines, using M208001 kit

\$20/each test (1-3 cell lines)

\$15/each test (4-9 cell lines)

\$12/each test (10+ cell lines)

Provide the *Mycoplasma* contamination analysis ([gel images](#))

[Necessary information and materials:]

•Cell lines (names, sources).

•All samples (cells, cell lysates or cell culture medium supernatants) must be boiled for 5-10 minutes before shipping

•Shipping condition: ice-pack

Shipping to (Zmtech science laboratory): 5020 Fairway street, suite 224, Montreal, QC, H8T 1B8

2. Custom *In vitro* siRNA Design and Synthesis Services.

Two pairs of target gene siRNA (~26 μ M x 100 μ l /pair) /\$559

Three pairs of target gene siRNA (~26 μ M x 100 μ l /pair) /\$699

(supplied with a negative control siRNA)

Features and Benefits:

- Target gene suppression up to 95%. At least 1 of 3 siRNA provides 70%-95% silencing in most mammalian cells.
- High quality 21-mer siRNA duplex is ready in fast turnaround times.
- Ready-to-use *in vitro* siRNA oligomers can be transfected directly into target cells.

[Necessary information and materials:]

Target protein (gene's name, gene's reference number, or mRNA sequence).
